

It is with **great enthusiasm** that we announce the next country where Visions will be promoting **meaningful educational opportunities** for disadvantaged youth...

N I C A R A G U A

Beginning this month, we are launching our first initiative – an **e-Learning Program** to promote the development of **reading & tech literacy skills** and improved **proficiency in English and mathematics** amongst rural schoolchildren in the Matagalpa region.

And our biggest project to-date (by far!) is also now underway – the development of the **Vera Corazón School** – a residential school for disadvantaged girls in Matagalpa. Tentatively set to open in **February 2019**, the school aims to provide an ideal learning environment, in which students will not only benefit from instruction in standard subjects, but supplementary education in **English, IT/computers, leadership, & entrepreneurship**, and participation in a wide range of **extracurricular opportunities**.

Over the next several months, we look forward to sharing many more updates with you all on this invigorating new chapter in Visions' development, and we invite you to be a part of the journey!
